

INDUSTRIAL & COMMERCIAL TRANSPORTATION SERIES BRIEF

An Innovative Single Terminal Solution

TE Connectivity's (TE) Jiffy Splice for DEUTSCH contacts is designed to withstand the harsh conditions of the construction, mining, marine, and agricultural industries. It is easy to install and can be used to quickly repair damaged electrical connections on equipment at the jobsite.

Jiffy Splice is a field-serviceable alternative to permanent splices. Made from the same high quality silicone elastomer as DEUTSCH industrial connector seals and grommets, the Jiffy Splice body houses a contact retention system that secures a mated pair of contacts in a compact environmentally sealed unit.

For harsh environment applications that require a rugged single terminal connection and for quick fixes in the field, TE's Jiffy Splice for DEUTSCH contacts is a dependable solution.
